

Warsaw, 3 March 2020

## Thanks to the support of STS, AVEZ Esport will compete in the Flashpoint qualifier

STS, the largest bookmaker in Poland, which also operates in several European markets, established cooperation with AVEZ Esport – the only Polish CS:GO team to make the Flashpoint qualifier. The bookmaker became the main partner of the trip to Los Angeles where the "octopuses" will represent Poland at an international level in a significant tournament.

*"In the area of gaming, STS is constantly increasing the scale of its operations and meets the expectations of players. We are actively involved in supporting promising Polish players, both individual players and teams as well as esports organisations. We also sponsor important events and tournaments for the Polish esports scene. That is why we decided to support AVEZ Esport by becoming the main partner of their trip to Los Angeles where they will play in the Flashpoint qualifier"* – **Mateusz Juroszek, CEO of STS.**

AVEZ Esport were the only Polish team to pass the Flashpoint open qualifier playoffs without losing a single game and thus advanced to the closed qualifier stage which will take place in Los Angeles. In the competitions scheduled for 3-5 March, AVEZ will compete against Chaos Esports Club, SKADE, Orgless and Redemption POA. The teams are competing for the prize pool of 64 thousand dollars and two places in the league competitions, where there will be a million dollars to win.

*"Esports entered the top ten of the most frequent bets made by our gamblers, and they are still growing in popularity. Therefore, we are investing in building even greater recognition among the fans of esports – we are constantly developing our offer, meeting the expectations of players and supporting the domestic esports scene with further developments and professionalisation which is proven by the cooperation established with AVEZ Esport"* – **Mateusz Juroszek, CEO of STS.**

The bookmaker actively engages in supporting Polish sport, being **the largest private entity of the domestic sponsorship market**. STS is also involved in supporting esports. STS supports **Paweł 'innocent' Mocek**, a CS:GO player who competes in international events. The agreement between STS and Mocek was the first time in Europe that a bookmaker supported an individual pro Counter-Strike gamer. The leading Polish bookmaker has also decided to provide support for **Damian 'Nervarien' Ziaja**, one of the most popular gaming influencers in the Polish world of League of Legends. The agreement signed with him was the first case of a bookmaker becoming involved in promotional activities directed towards the League of Legends community in Poland.
